

Simon

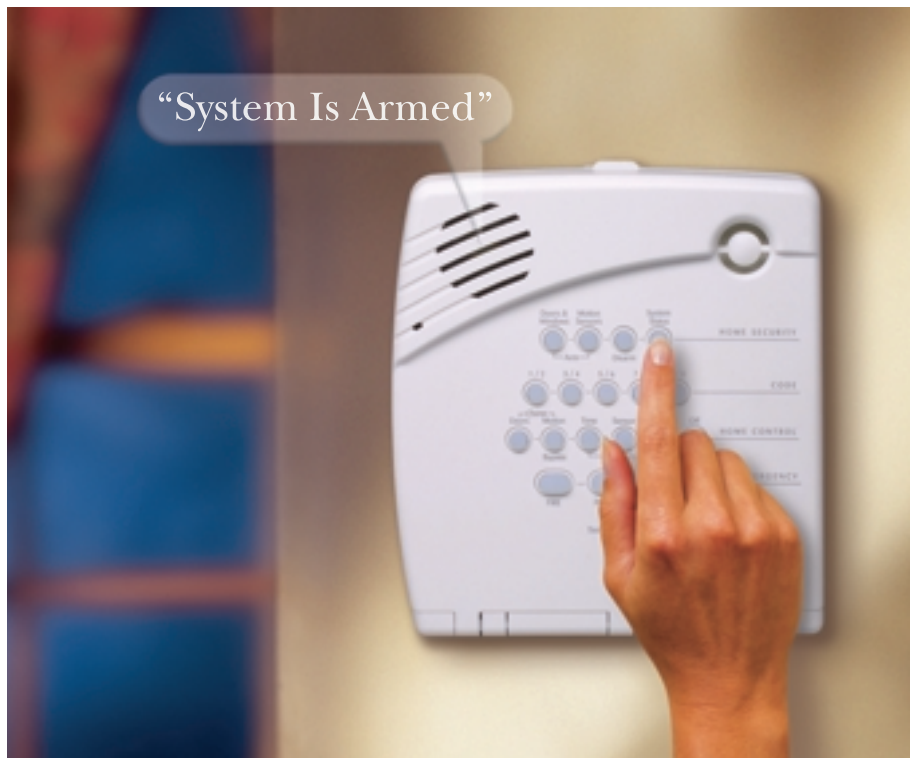

Security System

Simon Says...Simply The Best In Security

Simon® is not only the world's most advanced wireless security system, it is also the easiest security system to install and operate. From hassle-free

installation, to ultra-sophisticated sensor design and a full range of innovative "user-friendly" features, Simon puts the power of new technology at your command like never before. When it comes to helping you protect the things you value most; Simon is simply your best choice

Security Made Simple With Simon

You Are Never Alone

Simon is designed to respond instantly to any type of emergency (fire, intrusion or personal) – automatically or at the touch of a button.

Custom Designed For You

Simon offers a full range of built-in security features. Door chime, for example, lets you know when a child has opened an outside door or when a customer has entered your business.

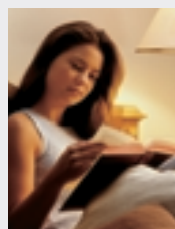

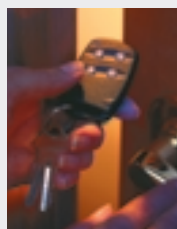

Easy To Understand System Operation

Simon's built-in digital voice directs you through every step of operating the system. It is so simple that even a small child can follow the instructions and use the system.

Peace Of Mind Installation

Because it's wireless, Simon installs in hours, not days – with no mess, no wires, no dust or imposition.

System Control To Carry With You

Simon offers pushbutton control you can carry on a keychain or keep bedside.

A Full Range Of Selectable Options

Less Worry For Working Parents

Parents need to know that their children are home safely from school. If a child does not disarm the system within a scheduled time, Simon will call your telephone or pager to let you know.

Be Informed, Wherever You Go

Simon can call any telephone and leave a clear, concise voice message notifying you of system events such as alarms or latchkey disarming.

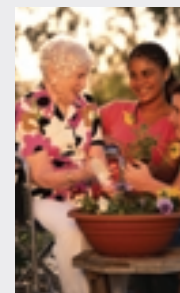

Your Direct Voice Connection To Emergency Response

Simon provides a nearly instant voice connection to the central monitoring center in the event of an emergency—without the need to press buttons to talk or listen to the operator.

Special Care For Elderly Or Disabled

Simon is designed with special security needs in mind. In addition to a full range of personal emergency pendants, Simon can call for help should it detect a lack of activity within your home or business.

Even More Control

Only Simon offers a supplementary talking touchpad to serve a back door or master bedroom.

X10 Control

Simon gives you the option to control lights and appliances with X10 line carrier technology—by schedule, by event or with the press of a button.

Simon—Protecting The Things You Value Most

Door/Window Protection

Motion Detection
