

Secure Lite Multimedia Fingerprint T&A Terminal

What is Secure Lite?

Secure Lite is a multimedia fingerprint time and attendance terminal developed by HIT Corporation, it is based on self-researched and developed multimedia ZEM510 platform --- the leading figure in biometrics field. It is the first fingerprint attendance terminal in the world that adopts 3.5 inch TFT, 65000 true color, and 320*240 resolutions. Our high technology enables you to enjoy visual image.

It supports T9 input method, which could input English letters by keyboard. The optical sensor of Secure Lite adopts new anti-seismic design which ensures fingerprint image be clearer and more effective.

It communicates with computer through TCP/IP and USB. Each Secure Lite has the only legally authorized MAC address and it can be used in complicated internet environment. Supporting U-disk function, users can upload self-defined background pictures. Besides, humanitarian interface design is adopted by the device. Whole graphical interface and facilitates navigation enable users and devices to interact directly and friendly.

High-efficiency fingerprint identification algorithm

TCP/IP network port, support network segment

Support USB downloading

Schedule bell

3 inch TFT color screen, wholly interface display

Technical Specification

User Capacity 10,000 templates
Transaction Capacity 100,000 records

Display 3" TFT Colour
Fingerprint Sensor Optical Sensor
Algorithm Biokey VX9.0 and VX10.0

Keypad 16 Keypad
Additional Features Messaging Function

Identification Time 1 sec
Verification Speed <= 1 sec
FAR <=0.0001 %
FRR <=1 %

Communication RS232 / 485, TCP/IP, USB Host & Client
Standard function User-defined Function Keys, Short Message, Schedule Bell, T9 Input, Photo ID

Power DC5V 800mA
Operating Humidity 20% - 80%
Size 160(W)*140(L)*45(H)mm

Secure Lite

Standard industrial appearance design

High speed USB multimedia fingerprint T&A terminal
